PROJECTS

[SUPRA WATCHES](#) — MERN- [live/github](#)

A MERN stack online watch store that can do business all over India. It consists of both user and admin panel along with secure and reliable payment gateway.

[WATCHVERSE](#) — REACT, Tailwind Css- [live/github](#)

A video sharing application that is built on REACT. Implemented debouncing on search box for performance optimization. Also added nested comments and live chat(random values) that shows the real-time engagement for enhanced user experience.

[SUPRA STORE](#) — Handlebars, Express.js, MongoDB

-user- [live/github](#) admin- [live/github](#)

E-commerce application dedicated to sneakers having a potential of impacting more than 5 million people in India. The stack helped in building a powerful and versatile eCommerce platform for both users and administrators. All the major features are added to represent the core functionality of a comprehensive eCommerce application.

[NETFLIX-CLONE](#) — REACT, TMDB-API- [live/github](#)

This project is a trailer streaming application for movies and TV shows. The app utilizes the TMDB API to access the data, including trailers. Users can browse content across various categories, watch trailers and enjoy a seamless user experience without page reloads.

[PORTFOLIO](#) — REACT, JavaScript, CSS3, HTML- [live/github](#)

A React powered portfolio application showcasing my skills and talents highlighting the unique value through a visually stunning interface which is also compatible for mobiles.
